AVSI

Core Competencies

- Program/Project Management
- System Design
- Installation, Upgrade & Maintenance
- Integration
- Access Control
- Intrusion Detection
- Closed Circuit Television (CCTV)
- Video Monitoring
- Maintenance
- System Training
- Technical/Training Documentation
- UL Compliant Systems
- Asset Management & Maintenance
- Data Centers / Cage Buildouts

Why AVSI?

We hear you! Our security team listens to you and works with you to gather your requirements. We don't want to sell you something you don't need. AVSI will design a system that meets your requirements and budget. We use trained security technicians to install a range of customize systems to include intrusion detection, access control, CCTV and video surveillance. Our security integration services and preventive maintenance programs will keep your system running the way it was intended.

PAST PERFORMANCE

Customer	Scope of Work
Peterson Group @ National Harbor	Installed aimed and focused camera's to customer requirements. Provided installation and configuration documentation to include schematic diagram and part numbers. Provided Installation of cameras and configuration of system viewing.
US Army Transportation Museum Fort Eustis	Video Surveillance System / CCTV systems upgrade. Requirements included the removal and disposal of existing hardware, integration of existing components, upgraded to IP-based system, provided as-built documentation and end-user training. Installation included both interior and exterior cameras.
Dept of Treasury	Replacement of existing lock / core system with designated enterprise scheme to include re-core /re-key of entry. Installation of key management system with integration into existing access control system. Installation of additional components (panels and readers) required to interface with electronic key management system.
Equinix LLC	Aiphone integration and programming
(DCSA) Defense Counterintelligence and Security Agency	Electronic physical security systems installation, maintenance and monitoring

Access Control Systems

Control WHO has access, WHERE they have access and WHEN they have access

Card reader systems • Biometric readers • PIN keypads • Electrified lock installations • Turnstiles • Badge printing/ employee tracking • Alarm monitoring • Full turnkey systems • Server installation • Software maintenance

Closed Circuit TV/Video Surveillance

Deter Crimes, Monitor Activities, Collect Evidence, Keep Records

Analog & IP Cameras • Pan Tilt Zoom Cameras • Covert/Hidden Cameras • Digital Video Recorders • Network Recorders

Asset Management

Control assets and maintain accountability. Secure storage solutions to protect assets and automate access.

Key Management • Equipment Management • Secure Storage • Process Control • Fleet Management

Lock Hardware and Installations

Secure your facility, add beauty, and increase convenience

Electrified Door Strikes • Maglocks • Push Panic Bars • Door Hardware • Certified Locksmiths • Door Sales and Installations

Intercom/Telephone Entry

Visitors communicate from the entrance of your facility to request access

Audio/Video Intercom Systems

Intrusion Detection Systems

Detect threats as they emerge

Burglar Alarms • Motion Detection • Panic Alarms • Central Monitoring Station • Encrypted Alarm Signal • Communications for SCIF and Government installations

Emergency Call Stations

Provides additional security for public use Help Point Emergency Systems
